

Emblema, for Faema Lovers.

The road towards the future has been outlined and Faema is following it with Emblema. Born from the cooperation with Giugiaro Design, Emblema is the newest symbol of the company, representing the highest point in the range. Emblema is a combination of various elements, aesthetical and functional, that merge together in order to form a product exclusive in technology and exceptional in performance.

Elegance. Emblema is innovative in shape with its aluminium and steel design, contrasting anthracite panels and blue lights, futuristic group heads, and its raised logo which emerges from the front panel and on the handles.

Ergonomics. Its precision push-buttons, open work area in stainless steel, easy to read graphic display, spacious cup warmer and inclined filter handles make using Emblema a pleasurable experience.

Performance. Ultimate Faema cup quality combined with unparalleled productivity.

Faema-patented technology:

- **Smart Boiler**, Faema's patented digital boiler management system. With Smart Boiler, the boiler fills with water in small increments every time the machine is used. This significantly boosts steam and hot water capacity (+30%), keeping the boiler at its maximum steam pressure at all times, ensuring no down time during peak business hours.
- **Adjustable thermal balance system**, allows you to regulate the water temperature by simply turning a mixing valve. By regulating the flow of hot water in the thermosyphonic circuit, you can fine tune the brewing temperature in order to best adapt to your blend of coffee. Easily accessible, the barista can set individual temperatures for each group in moments and without switching off the machine.
- **Auto Steam**, Faema's patented temperature-sensing steam wand system that simultaneously delivers steam and air, allowing the hands-free heating or frothing of large amounts of milk without manual intervention.

Faema has significantly contributed to the history of professional espresso coffee and cappuccino machines in Italy and around the world. Faema has been producing espresso coffee machines with distinctive elegant design and always innovative technological features since 1945. The Group is based close to Milan. Its 4 manufacturing plants, covering a total of 75,000 m², of which 40,000 m² indoor, represent the world's largest area completely dedicated to the production of professional espresso coffee machines. Today the Group exports more than 70% of its production in more than 100 countries through a network of more than 700 direct distributors that are organized to provide also after-sales support to end users.
